Dear Customer

This month's photo shows Boreal Maritim's service vessel M/S Tor Arne on an oil spill preparedness contract for the Goliat field.

With our two versatile boats and multi-skilled crew we are also active in fish farming, offshore support and with general maritime construction and repairs. We have participated in several projects in the High North and are ready for more. Please click [here](#) to read about one of our interesting offshore maintenance projects.

We are also able to assist with your recruitment needs. Our personnel department in Tallinn, with their competence and network, will find the right people for your business. Areas of expertise are again within offshore, fish farming and construction.
